### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 21 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which "delaying a start of the purge procedure if the calculated amount of available temporary memory is below a

Art Unit: 2164

predetermined period threshold" was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It's unclear to the Examiner how the procedure would delay the start on the predetermined threshold if the limitation before does not claim a threshold and only claims the step of calculating the amount of memory available for storing data. Applicant is required to establish a connection between the limitations. Since the claims are enabling art will not be applied.

Claims 22-30 are rejected under 112, since they depend from a rejected claim and they inherent the independent claim's deficiency.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The term "if" in claims, and 12 is a relative term, which renders the claim indefinite.

The term "if" is a relative term that renders the claims indefinite.

Regarding claim 21 the phrase "if" renders the claim indefinite, since the if is a conditional statement if the amount of memory is available is below a predetermined threshold, what would happen if not, this may raise a 101 issue. Clarification required.
